---

## PROFESSIONAL SUMMARY

Backend Developer with 2+ years of hands-on experience designing, building, and deploying RESTful APIs and scalable backend architectures using Django and FastAPI. Proficient in PostgreSQL, Redis caching strategies, and asynchronous task orchestration with Celery. Track record of optimizing database performance, integrating third-party services (Stripe, OAuth), and shipping production-ready applications on cloud infrastructure. Committed to clean architecture, maintainable code, and measurable performance gains.

## TECHNICAL SKILLS

**Core Backend:** Python, Django, Django REST Framework (DRF), FastAPI

**Databases & Caching:** PostgreSQL, MySQL, Redis

**Architecture & Concepts:** RESTful API Design, Authentication & Authorization, Caching Strategies, Asynchronous Processing (Celery)

**DevOps & Tools:** Git, Docker, Linux, Nginx, Gunicorn, Postman

**Cloud & Deployment:** AWS (EC2, S3, RDS), CI/CD Pipelines

**Integrations:** Stripe Payment Gateway, Google OAuth, Cloudinary, i18n/L10n

**Frontend (Supporting):** JavaScript, HTML, CSS

## PROFESSIONAL EXPERIENCE

### Freelance Backend Developer | Jan 2024 – Present

- Architected and deployed multiple production-grade backend systems using Django and FastAPI, handling authentication, payment flows, and complex business logic.
- Designed and implemented RESTful APIs with robust security layers and comprehensive documentation.
- Integrated Stripe payment infrastructure including webhook handling and transaction reconciliation.
- Engineered Redis caching layers and Celery-based background task queues to offload heavy processes and reduce response latency.
- Refactored and optimized database schemas and queries, achieving measurable performance improvements.
- Delivered scalable, modular solutions following clean architecture and SOLID principles.

## PROJECTS

### Natour Clinic — Cosmetic Services Platform

<https://cosmatics-production.up.railway.app/>

Django, PostgreSQL, Stripe, Celery, Cloudinary | cosmatics-production.up.railway.app

- Architected a modular Django application serving a multi-language cosmetic services marketplace.
- Implemented secure authentication with Google OAuth and role-based access control.
- Built a complete Stripe payment ecosystem with webhook verification and automated transaction handling.
- Delivered full multilingual support (EN / AR / HE) with robust internationalization.
- Leveraged Celery for asynchronous task processing, ensuring non-blocking user experience.

### Rovana Trade — Cost Calculator Platform

<https://www.rovanatrade.com/>

Django, JavaScript, AJAX | www.rovanatrade.com

- Developed a real-time cost estimation engine using AJAX, improving calculation accuracy and user workflow efficiency.
- Implemented multilingual support and SEO optimizations, contributing to improved search visibility.

### **GreenZag — Water Pipes Platform**

<https://greenzag.com/>

Django, DRF, PostgreSQL, Redis | greenzag.com

- Designed and built RESTful APIs with Django REST Framework for a specialized industrial platform.
- Implemented Redis caching and background processing to handle high-throughput operations.
- Developed an automated email notification system with queue-based delivery.
- Optimized database queries and indexing, enhancing overall platform responsiveness.

### **EDUCATION**

B.Sc. Computer Science — Arab Open University (2025)

### **LANGUAGES**

Arabic (Native) | English (B2+)
